PROFESSIONAL SUMMARY

Data Scientist and Full-Stack Developer with 2.5+ years of experience in data analysis, machine learning, web development, and scalable data systems. Proven track record of building automated ETL pipelines, developing end-to-end ML solutions, and creating web applications serving 100,000+ users. Reduced processing time by 40%, improved model accuracy by 18%, and saved 60+ hours monthly through automation. Currently pursuing M.Sc. in Data Science in Germany. Expert in Python, SQL, machine learning, and full-stack web development (ReactJS, Flask, FastAPI, PHP).

TECHNICAL SKILLS

Programming: Python, SQL, C++, Java, JavaScript, ReactJS, HTML, CSS, PHP

Data Science: Machine Learning, NLP, Clustering, Feature Engineering, Statistical Analysis, Predictive Modeling

Tools: Pandas, NumPy, Flask, FastAPI, FAISS, Git, Tableau, MySQL, PostgreSQL

Specialized: ETL Pipelines, Distributed Systems (MPI), Multithreading, Data Visualization

Languages: English (C1), German (B1), Hindi (Native)

PROFESSIONAL EXPERIENCE

Senior Project Technical Assistant

IIT Bombay, Mumbai, India | Nov 2021 – Jun 2024

- Analyzed 50,000+ cultural artifacts for Indian Culture Portal serving 100,000+ monthly users
- Automated 12 data processes saving 60 hours/month and eliminating 95% of data entry errors
- Built analytics dashboards tracking 15+ KPIs, increasing user retention by 25%
- Reduced data processing time by 40% and improved system response from 8s to 3s
- Optimized frontend performance reducing page load time by 35%
- Collaborated with cross-functional teams on UX improvements, increasing engagement by 22%

Data Science Intern

Flip Robo Technologies (Remote) | Dec 2022 – Jun 2023

- Built 5+ ETL pipelines processing 100K+ daily records, reducing prep time from 4 hours to 30 minutes
- Developed ML models (Random Forest, XGBoost, K-Means) achieving 85%+ accuracy
- Created 20+ engineered features improving model accuracy by 18%
- Built reusable Python library reducing code redundancy by 70%

EDUCATION

M.Sc. Data Science (Expected 2027)
XU Exponential University, Potsdam, Germany

B.Tech Computer Science and Engineering (2017 – 2021)
Dr. A.P.J. Abdul Kalam University, India

PROJECTS

Crime Data Analysis (Capstone Project)

Technologies: Python, SQL, Pandas, Tableau, Machine Learning

GitHub: github.com/anshul-1999/Crime-Capstone

- Analyzed 250,000+ crime records using K-Means and DBSCAN, identifying 12 high-risk zones with 78% accuracy
- Built 3 interactive Tableau dashboards reducing stakeholder analysis time by 50%
- Performed feature engineering and exploratory analysis on datasets with 25+ variables

AI Document Search and Chat (RAG System)

Technologies: FastAPI, FAISS, LLM, NLP

GitHub: github.com/anshul-1999/AI_DOC_Search

- Built RAG system with 90% answer relevance processing 500+ page documents
- Improved retrieval accuracy by 23% using hybrid BM25 + vector search (tested on 1,000+ queries)
- Developed FastAPI backend delivering responses in under 2 seconds with conversational memory

Distributed File Scanning System

Technologies: C++, MPI, Multithreading

GitHub: github.com/anshul-1999/Multi-Node-Distributed-File-Scanning-System-C-MPI

- Scanned 1 million+ files in under 5 minutes across 8 nodes with 6.5x speedup
- Processed 10GB data in 90 seconds using parallel execution
- Implemented MD5/SHA256 hashing for duplicate detection using Coordinator-Worker architecture

Information Retrieval System

Technologies: Python, Flask, NLP, TF-IDF

GitHub: github.com/anshul-1999/Offline-Information-Retrieval-IR-Search-System-Python-Flask

- Indexed 10,000+ documents achieving 82% Precision@10 with TF-IDF vectorization
- Delivered search results in under 200ms supporting 1,000+ concurrent queries
- Evaluated performance using Precision@K, Recall, and F1-Score metrics

CERTIFICATIONS

- BCG Data Science Job Simulation – Forage (2025)
- Quantum Data Analytics Simulation – Forage (2025)
- PG Program in Data Science & Machine Learning – Datatrained (2023) (Python, SQL, Data Wrangling, Visualization, Applied Statistics)
